2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest a data processing device that has a first processing unit having an integer calculation function, and a second processing unit controlled by the first processing unit. The second processing unit includes a multiplier for performing an integer data calculation and a fixed-point data calculation in response to a first instruction and a second instruction, respectively, from the first processing unit, and outputs a required bit length of the data from the higher-order side of a register when executing a second instruction on data whose bit length is shorter than the bit length of the register in the second processing unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
